

MACD Blaster PRO is an advanced trading system based on two indicators, each of which in turn is based on the MACD indicator. The system provides clear and precise signals to enter in the market, which will be understood even by novice traders. The strategy algorithm has a double trend confirmation and is capable of generating a weekly profit of 200-500 pips.

Characteristics of the MACD Blaster PRO

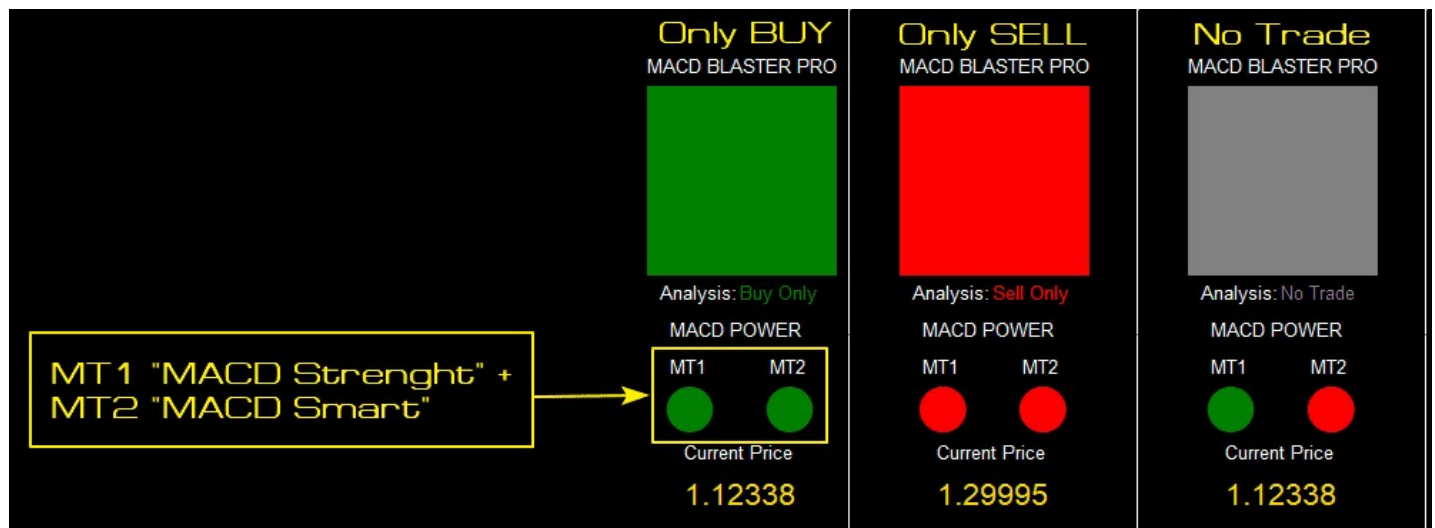

- Platform: [Metatrader4](#)
- Currency pairs: Any
- Trading Time: Around the clock
- Timeframe: M1-WN
- Recommended broker: [RoboForex](#), [InstaForex](#), [XM](#)

Indicators included in the MACD Blaster PRO

The system consists of two indicators:

1. MACD Blaster PRO Trend Analysis Smart Window - trend indicator, which shows the current trend direction. Based on its testimony, we will open positions only in the direction of the current trend. And, accordingly, we will ignore the signals against the trend, following the rule #1 of investor - "The Trend is Your friend".

The "MACD POWER" window displays two components MT1 - MACD Strength and MT2 - MACD Smart. The coincidence of the directions of these two indications determines the general direction of the current trend. Green – Only Sell, red – Only Buy. And the lack of trend in the divergence of the indications MT1 and MT2 - gray square:

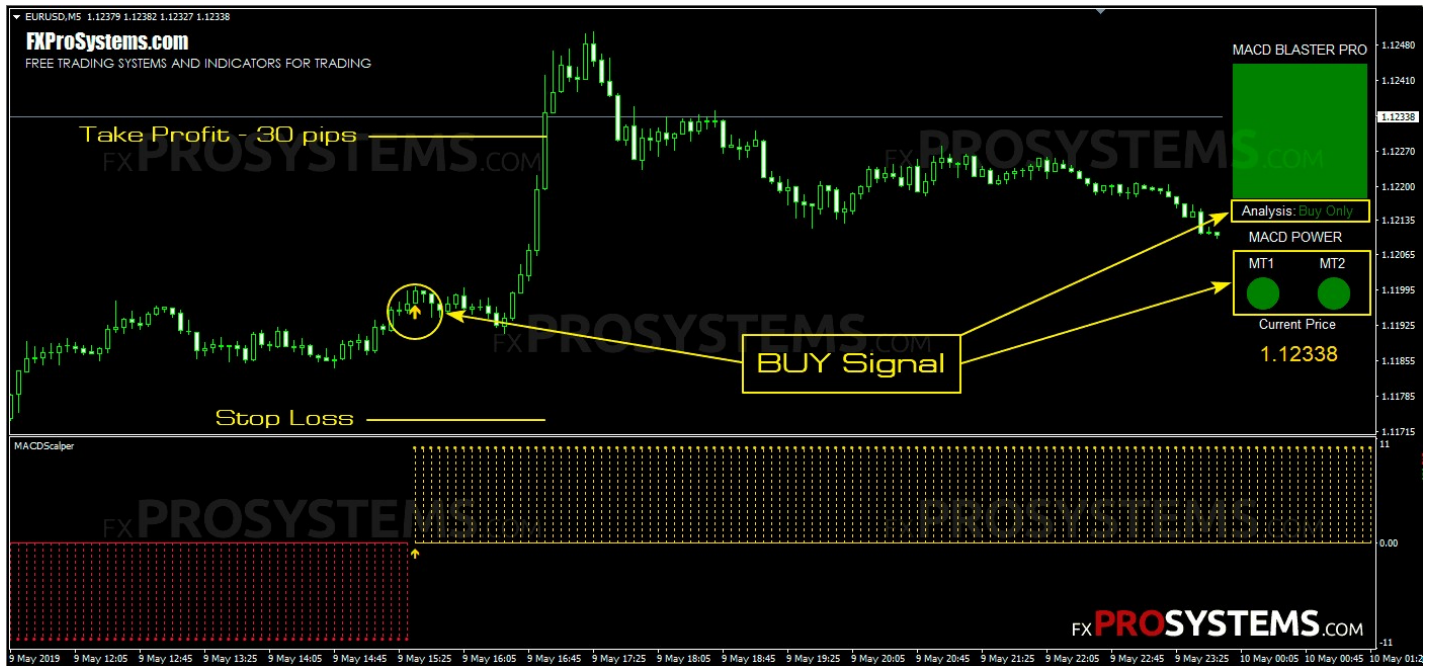

2. MACD Scalper Buy and Sell Arrows – signal indicator that indicates the entry point and has a duplicate histogram at the bottom of the chart.

Trading Rules

BUY signal:

1. Trend Analysis Smart Window is green
2. MACD Scalper draws yellow upward arrow
3. A yellow bar appears on the histogram:

SELL signal:

1. Trend Analysis Smart Window is red
2. MACD Scalper draws red downward arrow
3. A red bar appears on the histogram:

Stop Loss author of the strategy recommends using the standard scheme - several pips below/above the nearest support/resistance level.

Take Profit has a pre-set target for each timeframe:

Time Frame Take Profit

M1	18 pips
M5	30 pips
H1	80 pips

For other timeframes there is no data, you need to select it yourself.

It is also worth noting that MACD Blaster PRO is 100% no repaint trading system. Additionally equipped with Popup Alerts, Push Alerts and Email Alerts. However, despite the fact that the authors assure us that the system “ has been rigorously tested in real-time”, do not trust anyone until you check the profitability of the system on a [demo account](#).
