

Trendalt indicator with paint bars

Submit by Mike Trader 07/03/2014

Trendalt system is an trend following forex strategy based on trendalt indicator and the paint bars.

Time frame 5 min or higher.

Currency pairs:any.

Metatrader indicators:

Trendalt indicator (9),

Trendalt indicaor (14),

Trendalt indicator (19),

ArrzzX2 (price action indicator),

Paint Bars.

This system uses three indicators **Trendalt** with several bars count. The buy signal

occurs when a canal is opened from the area below the zero line to the area above zero.

In other words, when all the three trend lines cross the zero at the same time.

This signal is confirmed by paint bars green colour

This signal is confirmed by paint bars red colour.

The sell signal the opposite happens. (This signal is confirmed by paint bars red colour.)

All orders must be opened after the close of the previous bar (cross) and open again. You

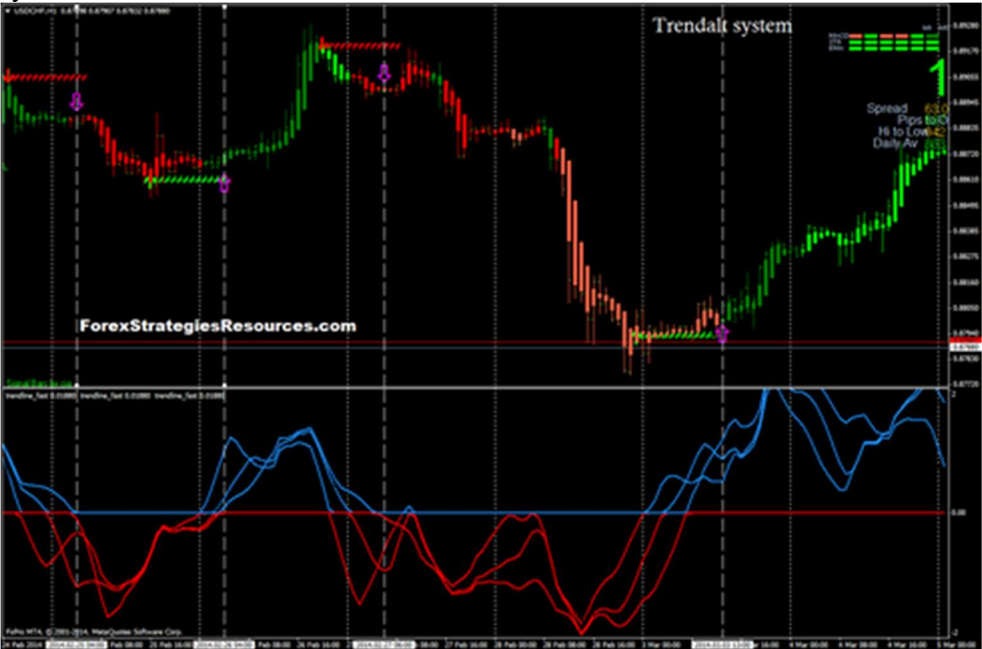

exit the trade when one of the three lines was reversed (crossed zero in the opposite direction).

Place stop loss on the previous swing.
