Trading rules 100% Profit Trading

Buy

The price bounces off the lower band level where a white square with an up arrow has formed.

The short moving averages (5-8) cross the slow moving averages (18, 28) upwards.

You can also enter when the price breaks the relative high. (optional).

Sell

The price bounces off the upper band level where a white square with an down arrow has formed.

The short moving averages (5-8) cross the slow moving averages (18, 28) downwards.

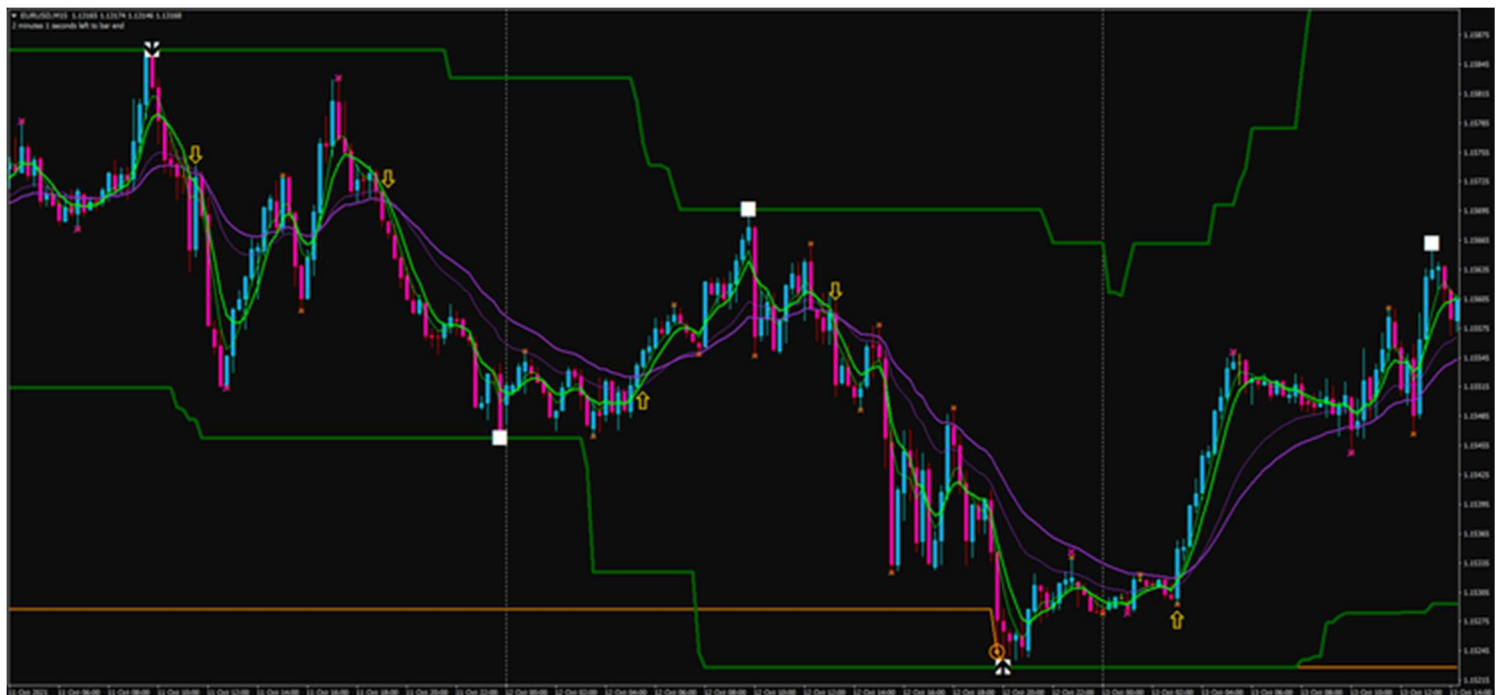

You can also enter when the price breaks the relative low. (optional)

Exit position

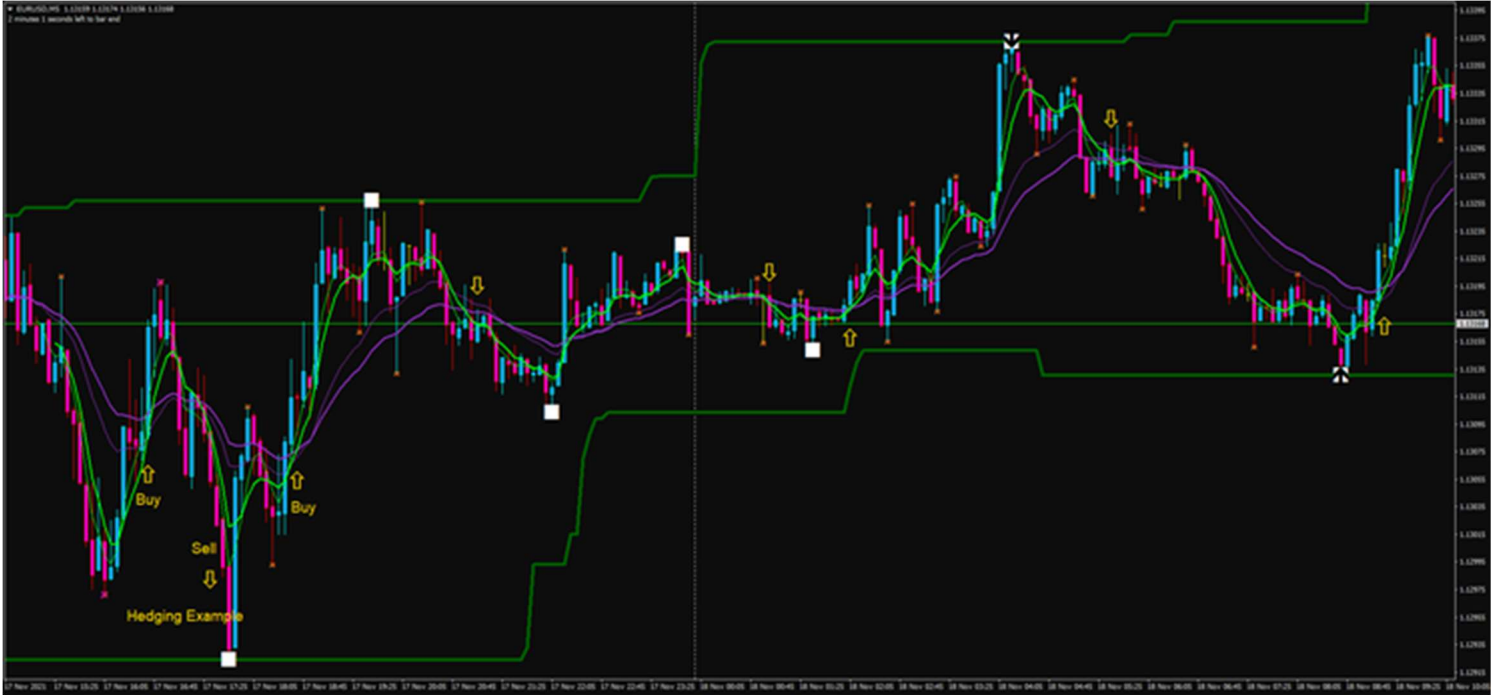

Place initial stop loss at the previous swing high/low.

Close the position with a predetermined target profile or at the opposite crossing of the moving averages.
