

793# Dark Energy Cycle

Price Action and Cycle Trading

Geometric Trading

Submit by Dimitry

Admin Comment

“This trading system was sent to me by Dimitri without comment after a search on the web and having also identified the source there is no explanation for this template.

Initially I did not want to publish this template without comment, then I decided to publish it because Dimitri pointed out to me that in any case it is composed of good indicators and precise indications on the trades to be taken.”

Dark Energy Cycle is a price action trading system based on geometric figures, support / resistance levels. Identify the trend and the best currency to trade, providing the entry and exit levels.

The merit of this system is that it clearly identifies the entry levels, thus providing a profitable prediction of the trade.

Time Frame 15 min, 30 min, 60 min.

Currency pairs: Majors and minors.

Metatrader 4 indicators.
