

852# Spaghetti FX Full Strategy

Trend Strategy

SpaghettiFX as Filter

Submit by Dimitri

Spaghetti FX Full Strategy is a trend following trading system which can also be used as a trend, trend arrow filter, trend momentum and breakout. In this review I show the basic Spaghetti FX templates and the templates as a filter of the 1-2-3 pattern and of the classic AscTrend used by the trend following arrow used in many paid systems (but which is free). First I introduce the two classic Spaghetti FX templates then I show you how I use Spaghetti FX as a filter.

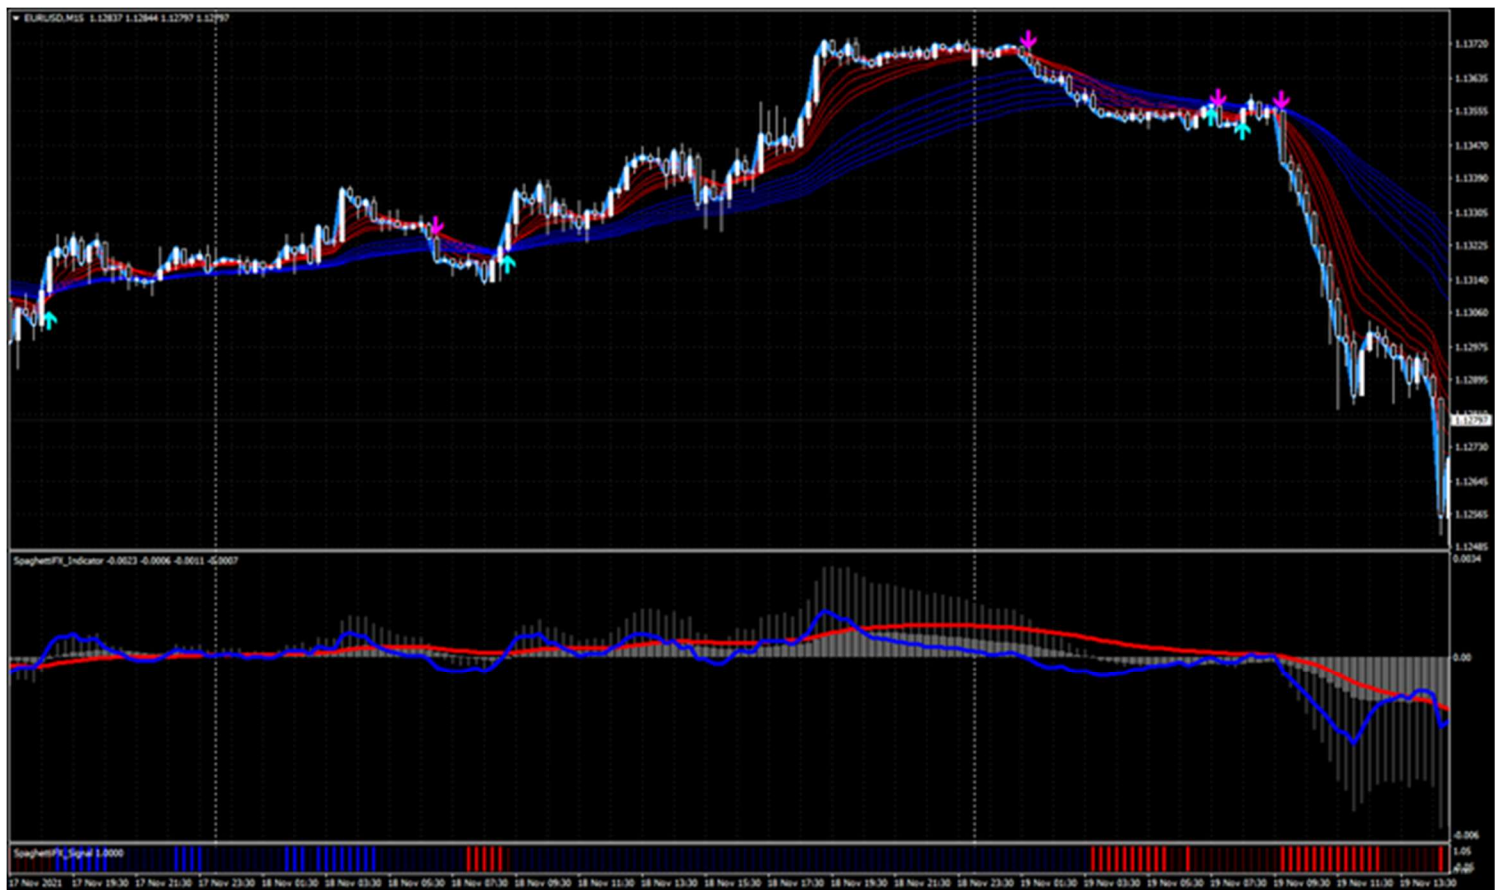

Spaghetti FX Basic

Spaghetti FX STM

Spaghetti FX Breakout with 1-2-3 pattern

Spaghetti FX with AscTrend

Setup Strategy

Time Frame 15 minuti or higher.

Currency pairs any.

Platform metatrader 4.

Metatrader 4 indicators

Simple moving average 1 period.

Moving averages fast (periods 3-15).

Moving averages slow (periods 30-60).

Spaghetti FX indicator

Spaghetti FX Signal

AscTrend risk 6.

Filter.

1-2-3 pattern.

Trading rules Spaghetti FX Full Strategy

Buy

Price above moving averages.

Spaghetti indicator >0 .

Spaghetti trend blue bar.

Sell

Price below moving averages.

Spaghetti indicator <0 .

Spaghetti trend red bar.

These conditions also apply to filter AscTrend, and the 1-2-3 pattern.

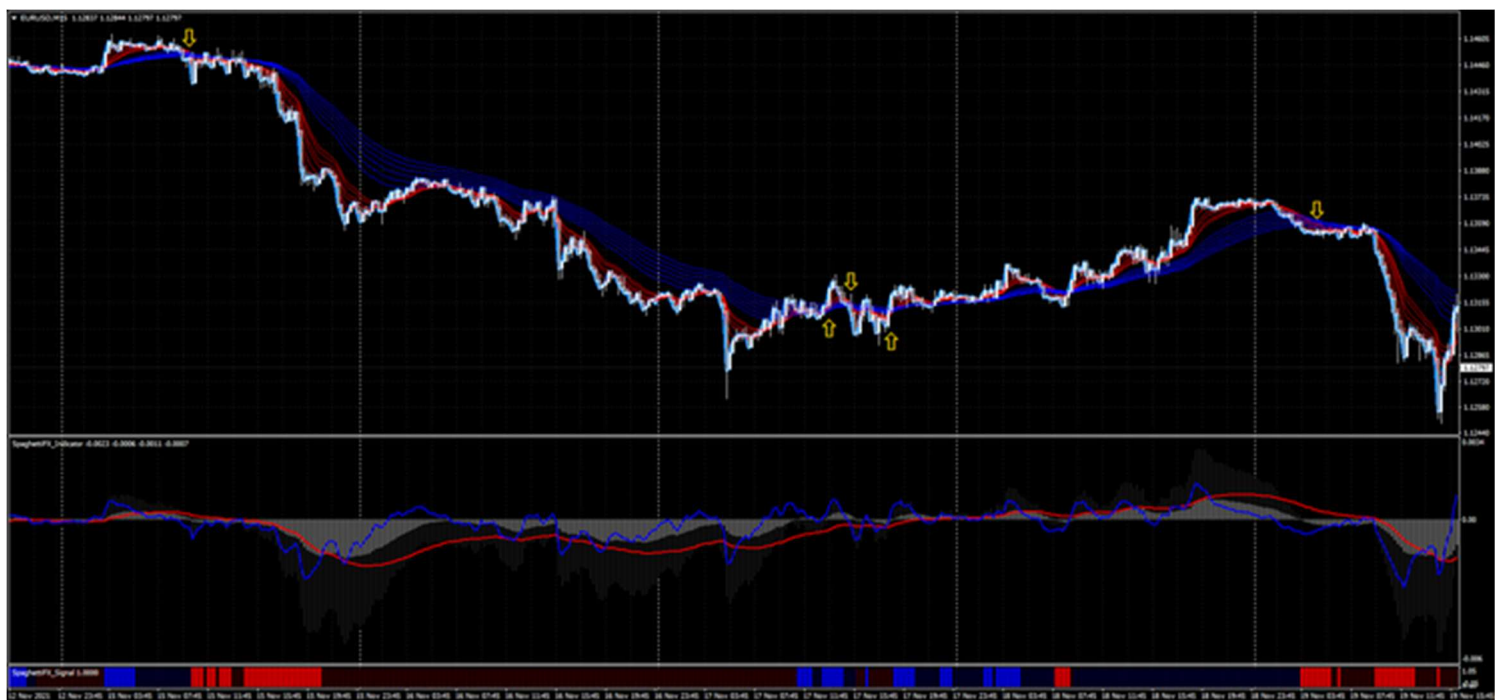

Exit position

Place initial stop loss above/below the previous swing high/low.

Exit at a predetermined profit target or when the trend has opposite conditions.

For the template with 1-2-3 patterns the output is at the opposite signal or with a 1: 1.1 stop loss ratio.

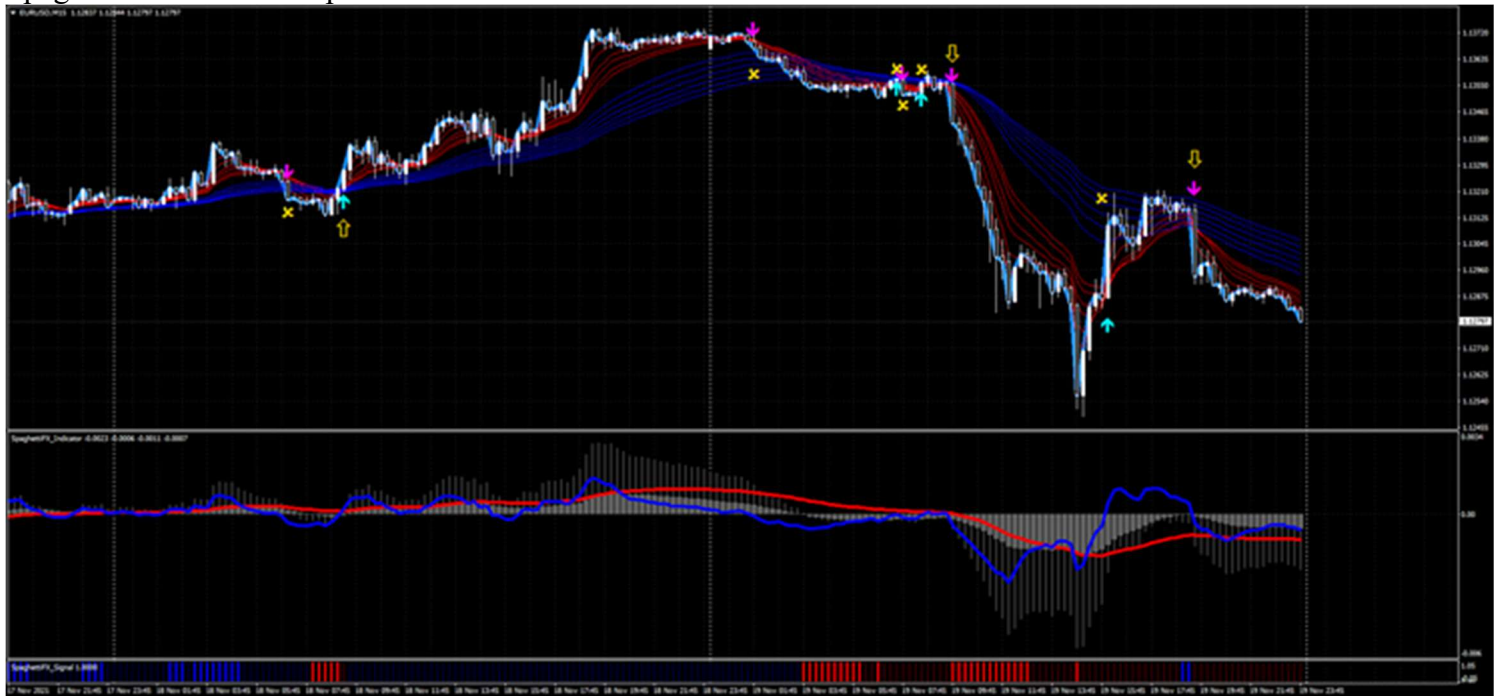

Examples

Spaghetti FX

Spaghetti FX with 1-2-3 pattern

Spaghetti FX with AscTrend

Spaghetti FX STM template.

Price above/below the moving averages.

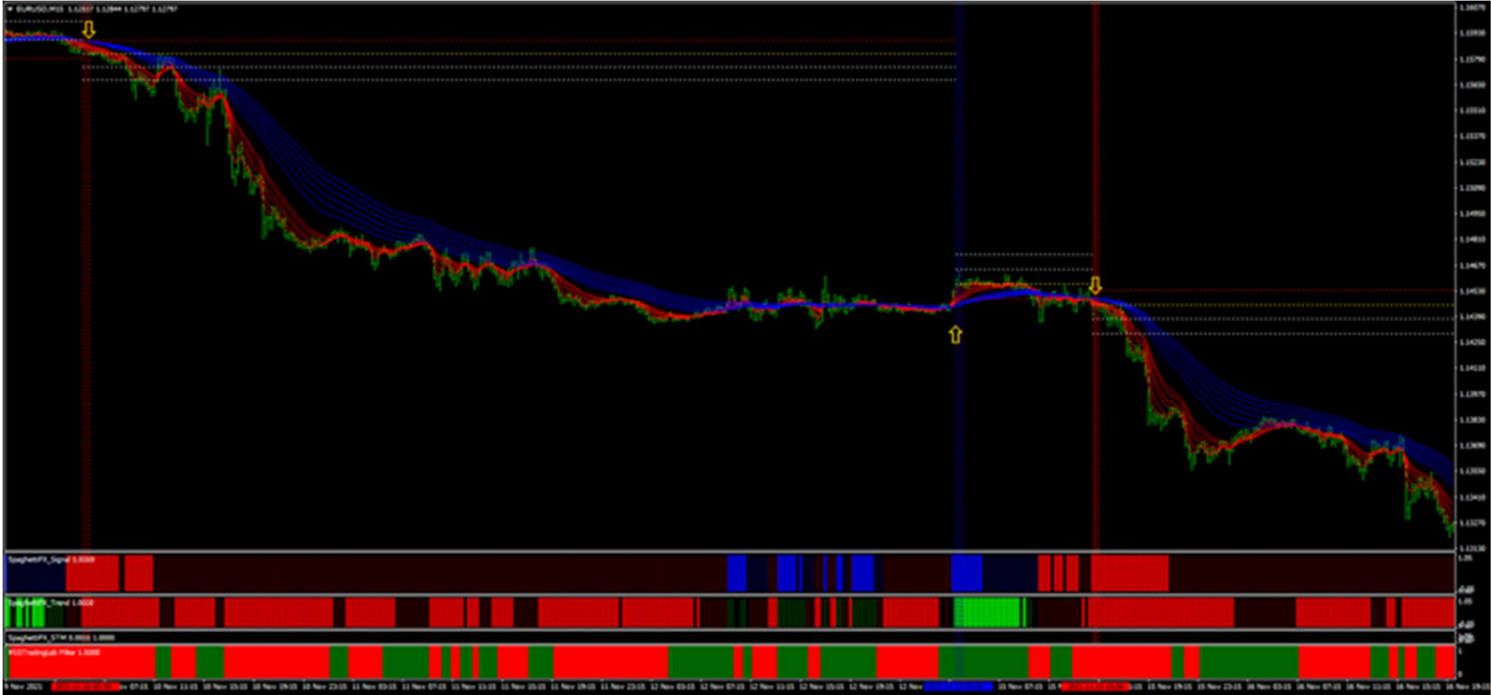

Below the chart two indicators at least two indicators I must agree on uptrend/ondowntrend.

Exit of position is like the previous ones.

Examples of trades.
