the last signalled by TDI Trend Signal Bar for long is a sign that a downtrend or sellers are weak and a change of trend in the near future.

as we took our fibonacci and measures the first group of waves retest between 50 and 61.8 but not more than 100, and rebound and retest that creates a double bottom that another confirmation shows a sign of an uptrend will come in the near future.

in this case we have to wait for the TMA2 for final confirmation. and the appearance of SUPER TMA and TDI Trend Signal Bar before TMA2 confirms the move.
